Box No. IV Lack of unity of invention

1. ☐ In response to the invitation to restrict or pay additional fees the applicant has:
- ☐ restricted the claims.
 - ☐ paid additional fees.
 - ☐ paid additional fees under protest.
 - ☐ neither restricted nor paid additional fees.
2. ☒ This Authority found that the requirement of unity of invention is not complied with and chose, according to Rule 68.1, not to invite the applicant to restrict or pay additional fees.
3. This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is
- ☐ complied with.
 - ☒ not complied with for the following reasons:

The only common item of the inventions of claims 1-6 is "1-(2-methoxyethyl)-2-methyl-4,9-dioxo-3-(pyrazin2-ylmethyl)-4,9-dihydro-1H-naphtho[2,3-d]imidazole-3-ium bromide." However, as described in WO 01/60803 A1 (example 154, page 9, lines 16 to 24 and page 16, lines 7 to 14), for example, this compound was a publicly known substance before the filing date of this application, and therefore this examination finds that this compound is not a technical feature that makes a contribution to prior art.

This being the case, this examination finds the above claims do not share a special technical feature, and the inventions therein are not so linked as to form a single general inventive concept.

4. Consequently, this report has been established in respect of the following parts of the international application:

- ☒ all parts.
- ☐ the parts relating to claims Nos. _____

2. Citations and explanations (Rule 70.7)

Document 1: WO 01/60803 A1 (Yamanouchi Pharmaceutical Co., Ltd.)
August 23, 2001

Based on the description in document 1 cited in the international search report, the inventions of claims 1-6 lack novelty and an inventive step.

Document 1 describes a condensed imidazolium derivative shown in General Formula (I) that is used as an anticancer agent (Claim 1; Example 154, etc.) Moreover, a bromine atom is listed as X in General Formula (I) (page 9, lines 16 to 24). Furthermore, document 1 states the isolation and purification of the condensed imidazolium derivative shown in General Formula (I) is performed by the application of conventional chemical procedures such as crystallization, recrystallization, etc. (page 20, lines 4 to 3 from the bottom), and that the condensed imidazolium derivative includes a substance with crystalline polymorphism (page 16, lines 7 to 14).
